Listening	95

Playing Two Lines

Before beginning this chapter, you should review the material on pages 20 and 21 concerning right hand technique. As you go through this material, pay close attention to the position of your right hand and how the fingers are working.

OPEN POSITION EXERCISES

To be a good fingerstyle player, you will need to have good control with your right hand fingers. The following open string exercises will enable you to concentrate on getting a good sound without worrying about fretting notes on the strings. Listen to your sound and try to get the best *tone* possible. Tone refers to the quality of your sound. It should be strong (but not forced), warm (but not muddy) and clear.

In Example 9 you'll only be using the thumb (*p*) on the lower three strings.

9
Track 10

The image shows a musical score for a guitar track. It begins with a treble clef and a 4/4 time signature. The first staff contains a series of eighth and sixteenth notes, starting with a piano (p) dynamic marking. Below the staff is a guitar tablature staff with fret numbers (0-9) indicating the fretting for the notes. The tablature is written for a single string, likely the high E string, and follows the pitch of the notes in the staff above.

Example 10 is on the first three strings and requires you to alternate between your index (*i*) and middle (*m*) fingers. This is a common approach to playing melodies on the upper three strings.
