## NOTES TO THE CONDUCTOR

This original composition is dedicated to and commissioned by the Yorkton Regional High School Jazz I Ensemble of Yorkton, Saskatchewan, Canada, under the direction of Mark Zawerucha. The work was exclusively done for the Yorkton's Regional High School Jazz Ensemble's performance at the Montreux Jazz Festival. The title, NARANJA, means orange in Spanish.

NARANJA is written in a *baion* Latin style with a mixture of Brazilian and Afro-Cuban rhythms. In the early 1960s the baion rhythm was borrowed from Brazilian music and has become one of the most basic rhythmic patterns in rock music.

The baion feel is not a samba. Its basic rhythm is one of the more challenging Latin grooves to play because the downbeat is rarely played in the bass. The feel is in two, but in examining the overall pattern, the accents occur on the upbeat of beat 2 and beat 4 (thinking in four). From time to time, I sort of play with the groove of the piece and on occasion, the rhythmic configuration seems to resemble a samba feel but quickly launches into a heavier baion style. The intricacies of the rhythms and harmonies make this selection a complex composition worthy of some additional time for the rhythm section to master the groove.

Depending on the skill of your band, a simple approach to the first nine measures is to slow down the tempo and bring it back up when the band is comfortable. The rhythm section will need to lock in the groove immediately in measure 7. The success of the rhythm section locking in the groove will depend on the accuracy of the sax section in measures 5 and 6.

At measure 17, bring down the volume of the rhythm section to accommodate the lead lines of the alto, tenor, trumpet, and trombone. Background figures should be kept tight and articulate at all times.

The bass player will most likely need to work with a metronome to lock in the groove. The bass part is critical to this chart, so I suggest the bassist become confident with the written part before the band begins to rehearse. Much of the guitar part is a guide to a rhythmic feel. The piano part is written out but if the pianist is knowledgeable and confident in this Latin style he or she may embellish, but avoid creating rhythmic clutter. The 8 measure drum solo at measure 125 can be repeated and extended or made into a percussion break down if desired.

The horns will see the *marcato* accent (rooftop) frequently in this chart. Play it detached but not staccato. A word of caution regarding the horns at this tempo: play with a light approach amidst the rhythmic complexity. If the horns, often the brass, play too hard and loud, the tendency is to drag. Play the unisons *mf*. Whenever the baritone sax has figures with the bass, direct him or her to listen and lock in to the feel and groove. Those figures should be approached as a color with the bass part, not a bari solo. The melody played by the four horns at measure 17 must be articulated as one.

For the soloist(s), I suggest cueing the backgrounds the last time through the solo and to clearly direct when to proceed on to measure 125. Soloists should be familiar with the sound of the chord roots and learn the notes in the chords and related scales.

NARANJA is challenging, but I believe you will find it worth the effort.

Enjoy!

—Victor Lopez
