## NOTES TO THE CONDUCTOR

*The Defibrillator* is basically a heavy shuffle chart with some nuances. For the sections that are notated as shuffle, make sure the drummer does not lapse into a typical swing eighth-note groove. The difference for a shuffle is a more exaggerated pattern on the snare and the ride cymbal, with a dotted eighth/sixteenth concept—but not quite that rigid—think of the syllables “chew-to-bacc-o” as a model phonetic sound in a triplet (or a loose dotted eighth/sixteenth) pattern with an accent on “bacc” as beat 3. There is a strong backbeat to a shuffle.

Measures 39–52 and 81–94 are marked “1/2 time feel.” I have written a triplet pattern that includes alternating cymbals for some rhythmic variety. If this is too difficult, a closed hi-hat consisting of simple shuffle eighths would also work—just be sure that there is a heavy back-beat on beat 3 and the bass drum patterns are played as written, but not too loud. This will ensure the 1/2 time feel is accurate. Measures 99–105 contain a brief, but more traditional swing interlude. Make sure that this section sounds like a typical big band swing by eliminating the heavy back-beat—playing a swing eighth note pattern on the ride cymbal will work well here. Measure 106 is a complete break down. A hi-hat click on beat 2 as written is all that is needed. Go back to the heavy shuffle from measure 107 to the end.

The bass part is written with an optional low E-flat. If your bass player does not have an electric 5-string bass with a low B string, disregard the notes in parentheses and play as written.

The first melody statement is at measure 7—direct the player to dig in with confidence. The melody throughout includes a written out “turn,” as in measure 7. If this ornamentation is difficult to play at first, simply eliminate it. As the musicians become more comfortable with the melody, add it later.

Measures 27–28 are arranged as a pyramid. Make sure each background entrance is not too loud in order to crescendo and eventually climax on beat 4 of measure 28.

Straight mutes are written in trumpets in the “1/2 time feel” interlude section. If there are not enough straight mutes, feel free to experiment with whatever combination of mutes you may have. It is an interlude section so it shouldn’t be too loud.

Lastly, having everyone play the articulations as written will help tighten up the sound of the ensemble and also help achieve the heavy shuffle feel. The *marcato* or rootop accent is played with a “daht” articulation, detached and not too short. At measure 81, the brass and bari sax have a “doo-dit” tenuto/staccato articulation on the eighth notes—keep it simple and not too loud.

Please enjoy!
