Attack Exercises in lower register

♩ = 60

♩ = 60

- Relax the lips except in the center where muscles should be slightly tensed horizontally while keeping the jaw a little in a relaxed position.
- Attack with the short air friction noise, with low air pressure behind the lower lip, vibrating well in the mouth.

Attack Exercises in middle and high register

♩ = 60

♩ = 60

♩ = 60

♩ = 60

- Attack with the same short air friction noise, with more air pressure behind the lower lip, vibrating well in the mouth.

Articulation Exercises

Accent the 1st note of the four, clearly articulating the last 2 detached with a single tongue movement.

Clearly accent the 1st note, broadening the 3 slurred notes, but articulating the last.

Accent the 1st note, make it distinctly clear from the 3 slurred notes by making it short and clearly lengthen the 3 slurred notes so as to keep the 4 notes quite equal.

Accent the 1st of the 2 slurred notes and diminish the second but do not let it go; diminishing gives lightness without inequality.

Two Kinds of Dotted Notes

for Polonaise

Light rhythmical character

for Grave

Solemn step, grave movement, 16th notes should be detached from dotted eighth notes, and played broadly, not lightly.

Appoggiatura

- First, play the Appoggiatura (♩) short on the beat.
- Second, play it longer, observing the musical effect.
- The long appoggiatura (involving 16th note) is best for musical expressiveness. It comes on the beat with the accent.
- The short one is light, rhythmical expression.
- The length of the appoggiatura is not so important as whether it is accented or not, and it comes on or before the beat.

Trills

Basically start all trills on the higher note and on the beat.

(See vol. 4)

(Note) When playing in harmony, narrow the 3rd, 6th & 7th in the major scale.

Hard Fingering Exercises

slowly – quickly
