# SONGS OF SAILOR AND SEA

ROBERT W. SMITH

## PROGRAM NOTE

**"Songs of Sailor and Sea"** was commissioned by and dedicated to Lieutenant Commander John R. Pastin and the United States Navy Band. The piece was composed in the late summer and fall of 1996 and was premiered at the Midwest International Band and Orchestra Clinic (Chicago, IL) in December of the same year.

**"Songs of Sailor and Sea"** celebrates man's eternal fascination with the sea and the centuries of seamen who have battled its powerful waves and mysterious depths. The composition is comprised of three settings, reminiscent of the sounds and images one might encounter when sailing the oceans of the world. Following the introduction, the composer has created a **"Sea Chanty."** Chanties, historically speaking, were songs sung by sailors to the rhythm of their movements while working. The composer has combined the chanty with shipboard sounds including the crashing of the waves and the raising of the anchor with its massive chain.

The second setting is entitled **"Whale Song."** Using a three-note motif actually sung by a humpback whale, the composer has woven together a beautiful melodic line accompanied by the natural sounds of the whale. The percussion have been creatively scored to capture the effect of the whale singing its song of life.

The final section of the work is entitled **"Racing the Yankee Clipper."** This is composed in tribute to the American clipper ships which established dominance on the high seas in the early to mid 1800s. These graceful and beautiful vessels established amazing speed records, some of which were not broken until as late as 1989. The exuberance and exhilaration the sailors must have felt when flying these great ships across the seas was the motivating force behind the creation of this setting.

## PERCUSSION NOTES

The opening "ocean drum" effect may be achieved with a synthesizer if necessary. The General MIDI patch entitled "Seashore" will provide an acceptable substitute.

The "Whale Song" presents a unique performance opportunity for the percussion section. In particular, the "whale effect" in the timpani is crucial. Using a moistened thumb, a standard conga thumb roll technique on the low drum will produce a moaning sound similar to the sound of a singing whale. Depending on the size of the hall, you may wish to amplify this effect. I have had success also using a rubber ball ("superball") to create the thumb roll effect. The bowed cymbals/gongs should be explored from a color standpoint to its fullest. The multiple pitched claves should work together to create the descending "clicking" sounds made by these mammals of the deep.

I would like to extend special thanks to Mr. John Campese and Mr. Todd Johnson, two very fine percussionists who served as consultants in the creation of these rather unique effects.

I hope that you and your ensemble find "Songs of Sailor and Sea" to be a rewarding musical experience. Best of luck in your musical endeavors. Best wishes for a great performance!
