PROGRAM NOTES

For centuries, music has played an integral part in the daily lives of Native Americans. From the ancient burial mounds of the Southeast to the cliff dwellings of the Southwest, Indian musical instruments and pictographs of ceremonial singing and dancing dating back as early as 600 A.D. have been uncovered by archaeologists.

In 1748, George Washington observed a Native American ritual and recorded the following entry in his journal in typical eighteenth-century fashion:

There manner of Dauncing is as follows Viz They clear a Large Circle and make a Great Fire in y. middle then seats themselves around it y. Speaker makes a grand speech telling them in what Manner they are to Daunce after he has finished y. best Dauncer jumps up as one awaked out of a Sleep and runs and Jumps about y. Ring in a most comical Manner he is followed by y. Rest then begins there Musicians to Play ye. Musick is a Pot half (full) of Water with a Deerskin stretched over it as tight as it can and a goard with some Shott in it to Rattle and a Piece of an horses Tail tied to it to make it look fine y. one keeps Rattling and y. other Drumming all y. while y. others is Dauncing. (Randolph, 1973: p.128)

George Washington's observations describe a ritual very similar to the "Stomp Dance," which is used as source material in a section of this composition.

In the creation of "Songs of Earth, Water, Fire and Sky" for symphonic band, the composer has chosen to draw upon various Native American dances and chants for inspiration. The use of these melodies is not necessarily authentic since they have been musically explored far outside of their original setting. Ethnic percussion instruments have been used to imply the original intent but have been expanded in both texture and rhythmic complexity for effect.

Following a full ensemble introduction, the composer uses the "Butterfly Dance" of New Mexico's San Juan Pueblo. The butterfly symbolizes elusiveness, the ability to always get away from danger. This elusiveness is a very desirable quality in an Indian warrior.

The "Gar Song" of Oklahoma's Creek Nation follows. Originally, this melody was used in a dance setting. The composer has chosen a more relaxed treatment. The song suggests the cultural importance of the fish.

The "Stomp Dance" of Oklahoma's Cherokee Nation features singers and dancers with shell shakers. After night has fallen, the performers gather around a sacred fire. The firekeeper calls for the ritual to begin. The ensuing dance and song invokes the Creator in prayer and worship.

The final section of the piece is drawn from the "Alligator Dance" of New York's Seneca, one of the Six Nations of the Iroquois. This dance is thought to have traveled to New York from the Southeast through intertribal contact. The "Alligator Dance" is one of the many social dances concerned with mammals such as the rabbit and raccoon or birds such as the duck, robin, and pigeon. The dance is performed indoors in a longhouse purely for entertainment purposes.

"Songs of Earth, Water, Fire and Sky" was inspired by the work of musicologist Charlotte Heth, a member of the Cherokee Nation of Oklahoma. In addition, Ms. Heth was an associate professor of music and director of the American Indian Studies Center at the University of California at Los Angeles (UCLA). From August through October 1975, Ms. Heth spent three months traveling to Indian reservations throughout the United States recording Native American dances and rituals. She is now the director of Native American Indian Studies at the Smithsonian Institution in Washington, D.C. These recordings served as the creative fodder for this composition.

"Songs of Earth, Water, Fire and Sky" is dedicated to the East Tennessee State University Wind Ensemble and Dr. Paul Hinman in commemoration of their performance at the 1998 CBDNA Southern Division Convention in Jacksonville, Florida. The composer also wishes to thank Dr. Pat Rooney, director of bands at James Madison University (Virginia), for his contributions during the final editing stages of the piece.

NOTES TO THE CONDUCTOR

The opening solo should be interpreted as freely as possible. Careful attention should be given to the balance of the open intervals beginning in measure 9. The divisi in the tubas is crucial in terms of balance. The rallantando in measures 15–16 should be as exaggerated as possible to heighten the effect of the tom-tom entrance at measure 17.

The tom-toms should be comprised of at least two individual sets tuned at approximately a third. One set should be tuned slightly higher than the other to give a multiple drum effect. The jingle stick will be most effective if placed in a visually accessible location for the audience. I suggest doubling the part as personnel and equipment allow.

Each chant in the piece should be delivered in the most deliberate fashion possible. The oboe/saxophone/euphonium statement at measure 21 should be uniformly interpreted as it relates to rhythmic and relative dynamic shape. However, do not be concerned with the presence of the oboe in relation to the saxophones and euphonium. Instead, be sure that each instrumental part is performed with utmost commitment.

The long decrescendo in the percussion beginning at measure 53 will require special attention. The gradual fading of the percussion groove into the distance is the desired effect. This is in direct contrast to the flowing three-part statement beginning in the horns, then joined by the flutes. This section should be conducted in two from approximately measure 57. Pay careful attention to the shaping of the horns/flutes as indicated. Feel free to experiment with a very rubato approach in the horns/flutes, even to the extent of pulling out of the percussion groove. The percussion should continue at the same tempo and dynamic direction no matter what is interpreted in the winds. (Note: Feel free to extend the written percussion part if your interpretation requires more time to settle.)

The long sustain in the tuba and low clarinets in measure 74 should be carefully balanced not to overshadow the flute statement. Note the two dynamic levels notated in the flutes. The 2nd flutes should play as strong as necessary for presence due to the extremely low register.

The percussion groove that begins at measure 84 should be as comfortable as possible. Please note the percussion instrument marked cajone/djembe. A cajone is a wooden box or cube with a hole cut in one side as a port for resonance. The desired effect is an earthy bass sound with natural decay. I suggest experimenting with various implements to get the desired sound. I have been most successful with large, soft mallets, as would be appropriate with a bass drum. A djembe may be doubled or substituted if needed. Another option would be a second bass drum with no dampening, tuned to achieve the desired effect.

The trill exchange between the clarinets and the saxophones should be seamless in the exchange, creating the smoothest of color changes. At measure 100, pay particular attention to the balance between the horn/flutes and the countermelodic solo in the oboe. The oboe should be given ultimate freedom in the interpretation of the line.

The woodwind choir at measure 108 should be as flowing as possible with particular attention given to the dynamic interpretation in the second and fourth bars. As in measure 100, the oboe solo at measure 112 should be carefully balanced for presence against the thicker melodic choir.

The accelerando that begins the “Stomp Dance” in measure 128 will require special attention. Strive for the smoothest of transitions, between 60 and 160 beats per minute. The piano should be very forceful in measure 141. The call-and-response between the trombone/euphonium and the saxophone/horns in measure 145 should be carefully balanced.

The winds should stomp their feet on beat 3 beginning at the percussion statement in measure 158. For added effect, I suggest adding ankle bracelets of jingle bells. The timpani during this section appears to be tacet; however, the timpanist should double the gourd or jingle stick parts depending upon the use of the ankle bracelets. If the bracelets are used, double the gourd.

The various wind entrances beginning at measure 180 should build with utmost intensity, creating a cacophony of sound culminating in the fortissimo accent in measure 184. The timpani/jingle stick rolls on the fermata in 188 should be accompanied with vocal shouts (whoops) as if the ritual has come to a most satisfying conclusion. The reprise beginning in measure 185 should be more majestic than the original statement in the introduction.

The long decrescendo in the percussion to end the composition should be treated as previously described. However, the percussion should play a noticeable ritardando with the winds beginning at measure 207. The final sustain in the winds should be allowed to settle before cuing the final roll in the sleigh bells. If the ankle bracelets are used as mentioned above, the winds should participate in the final roll with the percussion. Allow the decrescendo of the bells to decay naturally without rushing to the release.

Please note the optional ending notated in the last three measures of music. I have included this option to give you more latitude in programming order. If the piece is to be used to close a concert, I suggest using the optional ending, which brings the work to a more dynamic conclusion. The cut to the optional ending is notated at the end of measure 191.

I hope that you and your ensemble find “Songs of Earth, Water, Fire and Sky” to be a rewarding experience. I have thoroughly enjoyed the research and composition process. Best wishes for the most exciting and passionate of performances.

This page contains a musical score for a conductor, spanning measures 174 to 178. The score is arranged in a standard orchestral layout with the following parts:

- Woodwinds:** Piccolo (Picc.), Flute (Fl.), Oboe (Ob.), Clarinet 1 (Cls. 1), Clarinet 2 (Cls. 2), Clarinet 3 (Cls. 3), Bass Clarinet (B. Cl.), Contrabass Clarinet (CB. Cl.), Bassoon (Bsn.), Alto Saxophone (A. Sax.), Tenor Saxophone (T. Sax.), and Baritone Saxophone (Bar. Sax.).
- Brass:** Trumpets 1 (Tpts. 1), Trumpets 2 (Tpts. 2), Trumpets 3 (Tpts. 3), Horns 1 (Hns. 1), Horns 2 (Hns. 2), Trombones 1 (Tbns. 1), Trombones 2 (Tbns. 2), Trombones 3 (Tbns. 3), Baritone (Bar.), and Tuba.
- Strings:** Piano (Piano).
- Percussion:** Multiple Percussion (Mlt. Perc.), Timpani (Timp.), Percussion I (Perc. I), Percussion II (Perc. II), and Percussion III (Perc. III).

The score is written in a key signature of three flats (B-flat major or D-flat minor) and a 4/4 time signature. A large, diagonal red watermark reading "Preview Only" is overlaid across the entire page. The page number "BD9856C" is located in the bottom left corner.

(opt. add bells in winds on last note)

Musical score for conductor, measures 208-212. The score includes parts for Picc., Fl., Ob., Clars. (1-3), B. Cl., CB. Cl., Bsn., A. Sax., T. Sax., Bar. Sax., Tpts. (1-3), Hns. (1-2), Tbns. (1-3), Bar., Tuba, Piano, Mlt. Perc., Timp., Perc. I, Perc. II, Perc. III, and Sleigh Bells. A large red watermark 'Preview Only' is overlaid diagonally across the page.

Optional Ending

(opt. add bells in winds, dim. during last bar)

The musical score is arranged in a standard orchestral format with multiple staves for each instrument family. The instruments listed on the left are: Picc., Fl., Ob., Cls. 1, 2, 3, B. Cl., CB. Cl., Bsn., A. Sax., T. Sax., Bar. Sax., Tpts. 1, 2, 3, Hns. 1, 2, Tbns. 1, 2, 3, Bar., Tuba, Piano, Mlt. Perc., Timp., Perc. I, Perc. II, and Perc. III. The score is divided into three measures: 213, 214, and 215. Measure 213 contains the main melodic lines for most instruments, with a 'molto rall. to end' instruction. Measure 214 features trills ('tr') and a dynamic shift from 'ff' to 'f'. Measure 215 is the final measure, where many instruments play 'Sleigh Bells' and there is a 'dim.' instruction. A large red watermark 'Preview Use Requires Purchase' is overlaid diagonally across the entire page.
